

Are you ready for new normal?

RoomOrders is a digital ordering and payment platform that enables guests in hotels and restaurants to self-serve with their own smart phones.

RoomOrders reduces contact between staff, guests and objects like menus, helping hospitality providers into the new Low Touch Economy.

How does it work?

Guests simply scan QR codes or tap NFC tags on tabletops to view colourful digital menus and order with a click of a finger. Staff receives the orders on a tablet, PC or mobile phone.

Order is delivered when ready :)

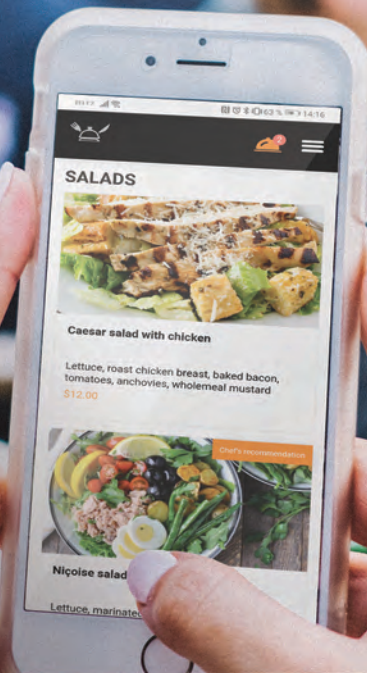

RO —

Click.

RoomOrders CLICK is for guest self-serve via their own smart phone device

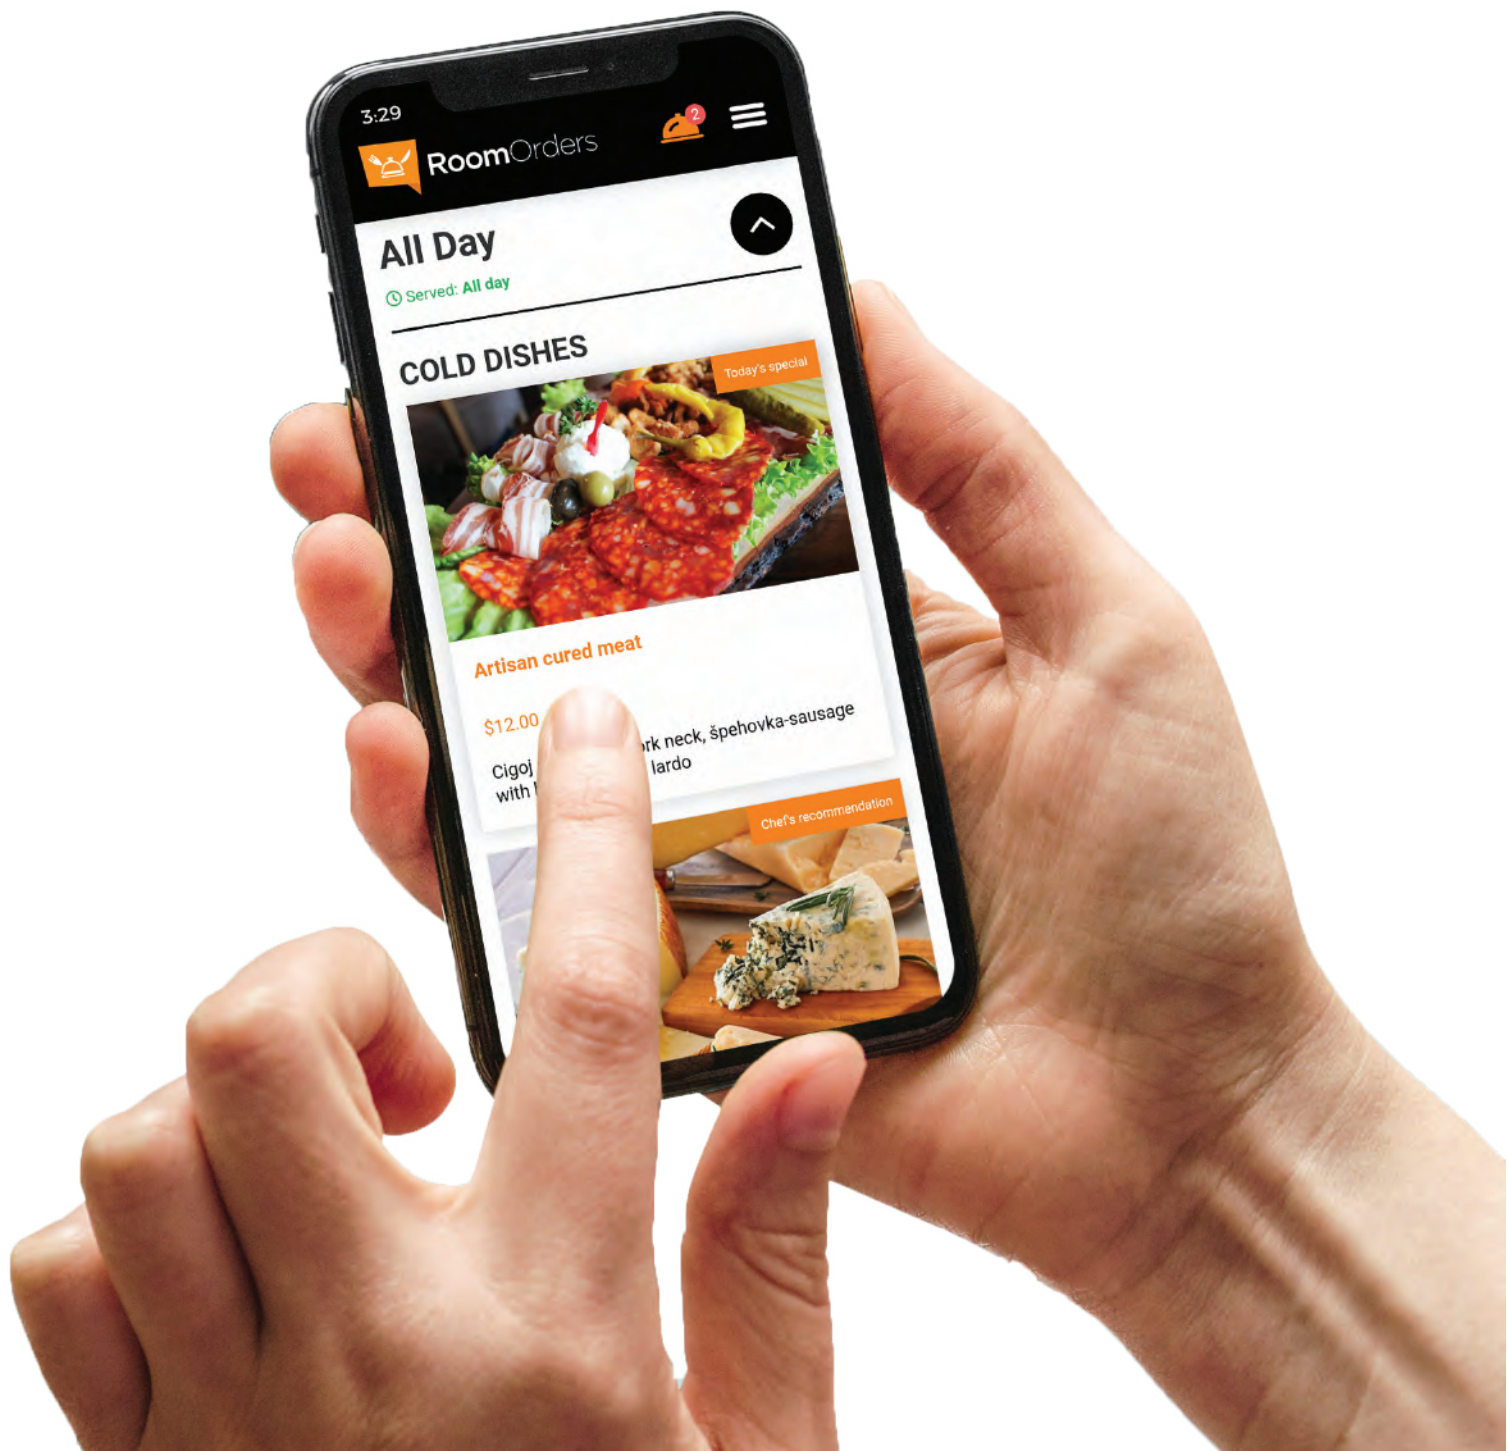

RO —

Serve.

RoomOrders SERVE is for waiters, to order for guests rather than memorise or write down orders
