Why I love Melbourne.

The perfect Melbourne coffee is difficult to create consistently due to both the quality of the bean blend and the experience of the barista behind the machine. Equally as important and often overlooked is the choice of milk itself. To create true coffee art requires a milk with a velvety, smooth finish and great texture to make it truly special.

Our brand of milk has been crafted by industry specialists to produce the best results in the cafe & restaurant industry. It features 3.5% fat content & standardised protein which improves the frothing of milk & its overall stability.

We continue to work hard to produce and deliver the best milk for the hospitality industry because we believe Melbourne coffee deserves it's reputation as the best in the world.

And that is something I love being a part of.
Terry Dedousis, The Milk Guys.

juices, pellegrino & water.

San Pellegrino has made its presence known, thanks to its lively and long-lived bubbles, which feel creamy on the palate, and a slightly salty taste, well-balanced with acidity for an overall refreshing, and thirst-quenching feel. A perfect drink for a flavorful meal, to balance a full-bodied wine or to sample on its own, its middle-size bubbles, persistent carbonation and rich minerality make it one of the most renowned mineral waters in the world. Thanks to its persistent effervescence, it brings out the best in the tastiest dishes and aromas. Discover the essence of San Pellegrino from The Milk Guys.
